Instant Full Report

Clinical PhenoAge

Saved assessment · 1 Nov 2026

This example uses fictional measurements and answers.

Approximate age

50 years

Result in context

Age at blood draw · 45

Simple difference · +5

Estimate minus age at the blood draw, in years.

Blood draw date · 2026-11-01

Fasting confirmed · Yes

How your inputs were used

Clinical PhenoAge combines your age at the blood draw with nine routine blood measurements. It compares a pattern in the measurements with the published reference. Laboratory intervals provide separate context for individual readings.

Measurement notes

Albumin · 42 g/L [7]

Within published guide

≥ 3.5 · ≤ 5.5 · g/dL · ABIM · January 2026

Your value in the reference unit: 4.2 g/dL

A protein in the blood, made by the liver.

Creatinine · 90 µmol/L [8]

Within published guide

≥ 0.7 · ≤ 1.3 · mg/dL · ABIM · January 2026

Your value in the reference unit: 1.018 mg/dL

A waste product filtered from the blood by the kidneys.

Glucose · 6.2 mmol/L [9]

Above published guide

≥ 70 · ≤ 99 · mg/dL · ABIM · January 2026

Your value in the reference unit: 111.7 mg/dL

The concentration of sugar in the blood.

C-reactive protein · 3 mg/L [8]

Within published guide

≤ 0.8 · mg/dL · ABIM · January 2026

Your value in the reference unit: 0.3 mg/dL

A protein that can rise with inflammation.

Lymphocytes · 25 % [10]

Below published guide

≥ 30 · ≤ 45 · % · ABIM · January 2026

The proportion of white blood cells that are lymphocytes.

Mean corpuscular volume · 94 fL [11]

Within published guide

≥ 80 · ≤ 98 · fL · ABIM · January 2026

The average size of red blood cells.

Red cell distribution width · 14 % (RDW-CV) [12]

Within published guide

≥ 9 · ≤ 14.5 · % (RDW-CV) · ABIM · January 2026

How much red blood cell sizes vary.

Alkaline phosphatase · 85 U/L [7]

Within published guide

≥ 30 · ≤ 120 · U/L · ABIM · January 2026

An enzyme found in several tissues, including liver and bone.

White blood cell count · 7.6 10^9/L [10]

Within published guide

≥ 4000 · ≤ 11000 · cells/µL · ABIM · January 2026

Your value in the reference unit: 7600 cells/µL

The total number of white blood cells.

Topics from your questionnaire

Physical activity · Your entries add up to 90 moderate-equivalent minutes a week. General adult guidance starts at 150 minutes of moderate activity, 75 minutes of vigorous activity, or a mixture. [3]

If suitable for your health, add an amount you can manage and increase gradually. Even a small increase can be useful.

Muscle-strengthening activity · You reported muscle-strengthening activity on 1 day a week. General adult guidance recommends at least two days, alongside aerobic activity. [3]

Consider an activity you can do safely, such as suitable resistance exercises. Seek individual advice if a condition or injury affects what you can do.

Sleep · You reported 6.5 hours of sleep a day. CDC guidance for your age group is at least 7 hours a day. [4]

Keep a consistent sleep schedule where possible. Speak with a clinician if sleep difficulties or daytime tiredness persist.

Alcohol · Alcohol carries health risks even at low levels. Your answers describe drinking habits; they do not establish a safe personal limit or diagnose dependence. [6]

Review how much you drink and how often. If you drink heavily or have withdrawal symptoms, seek medical advice before making a sudden change.

Fruit and vegetables · You reported 3-4 portions a day. WHO guidance is at least 400 g-roughly five portions-for adults. This question does not assess your whole diet. [5]

Consider a serving you could add to a usual meal, using foods you enjoy and can afford. Follow any dietary advice given for your medical conditions.

Recorded answers

How old are you? · 45 years

Which country do you live in? · Bulgaria

What is your height? · 175 cm

What is your weight? · 78 kg

About how much did you weigh 12 months ago? · 78 kg

How would you describe your overall health today? · Good

Have you smoked at least 100 cigarettes in your life? · No

Do you currently smoke cigarettes? · Not at all

Do you currently use any of these other tobacco or nicotine products? · None

Do you currently drink alcohol? · Yes

In a typical week, on how many days did you drink alcohol? · 2

On a day when you drank, what did you usually have? · Wine · 1 · 150 mL · 12%

About how many minutes of moderate activity do you do each week? · 90 min / week

About how many minutes of vigorous activity do you do each week? · 0 min / week

On how many days each week do you do activities that strengthen your muscles? · 1

Does a health condition, disability, pain or recovery from illness limit your activity? · No

During the past four weeks, how many hours did you usually sleep in a 24-hour period, including naps? · 6.5 hours

How often did you feel rested after sleep? · Sometimes

Do your work or caring responsibilities regularly disrupt your sleep schedule? · No

During the past four weeks, how often did stress feel difficult to manage? · Occasionally

On a typical day, how many portions of vegetables and fruit do you eat? · 3-4

Has a healthcare professional told you that you have any of the following? · None

Are you currently taking any of these prescribed treatments? · None

Does any of the following apply to you now? · None

Have you had a fever, infection or other short-term illness during the past two weeks? · No

Question for a follow-up visit

Were the collection conditions suitable for comparing this result with a future blood draw?
